## PRECAUTIONS TO BE OBSERVED BEFORE AND AFTER PEST TREATMENT

1. Avoid direct contact with any insecticide until dry.
2. All pets/animals should be kept away from treated areas until insecticides have dried and any odour has cleared.
3. Should you suspect anyone has come in contact with the treated area and has been affected in any way, contact the Victorian Poisons Information Centre on 131 126 (24 hours) and have this report with you.
4. Close all doors and windows during external treatment and keep closed until the odour has cleared. (This could take up to 3-4 hours). This is done to avoid any odour entering the building.
5. When gaining access to, or working in the roof void, overalls and gloves should be worn to avoid contact with any insecticidal products. The overalls and gloves should then be washed or disposed of immediately after use.
6. Infants and children should be kept off the floors and away from skirting boards until the product is dry.
7. If you suspect you are allergic or suffer any form of reaction it is recommended you leave the building during treatment and remain away for the remainder of the day.
8. You must advise us of any pets or any personal or family/staff allergies, or other health concerns.
9. Cover all food items and all food utensils prior to a treatment, as directed.
10. Please remove and store away all pet food bowls & feeders prior to treatment.
11. Please remove any hanging washing from clotheslines prior to an external treatment.
12. You must observe any verbal advice provided to you by our licensed technician at the time of treatment.

## FOR YOUR INFORMATION

All products used by RID Pest Control are registered with the National Pesticides & Veterinary Medicines Authority in the A.C.T. for use in your particular situation.

The vast majority of these pest control products are also registered for use in food manufacturing plants, restaurants, cafes, aged care facilities and commercial kitchens.

These new generation pesticide formulations are engineered to break down and neutralise in a relatively short time frame (which varies depending upon the individual product). This is to avoid the possible build-up of any residues in our unique eco-system.

RID Pest Control can offer 100% environmentally friendly pest control alternatives for almost all services carried out.

RID Pest Control are committed to the health and safety of yourself, your family, your pets and the environment.

RID Pest Control appreciates your feedback. Please forward any feedback related to the service provided to [accounts@ridpestcontrol.com.au](mailto:accounts@ridpestcontrol.com.au)

If you have ANY questions or concerns please don't hesitate to phone RID Pest Control on 0414 567 977.
